DETAILED ACTION

Allowable Subject Matter

1. Claims 31-56 and 58-67 are allowed.
2. The following is an examiner's statement of reasons for allowance: independent claims 31, 36, 49, 58 and 67 teach a first client forming a first message by encapsulating a point-to-point data unit within a network address request header that includes an identifier of a second client and a payload to be sent to the second client, a tunneling server that removes the network address request header to form second message that encapsulates the point-to-point data unit in a network address response header and communicates the second message to the second client.
3. The closest prior art of record, Verma, does not teach a network address request header as claimed. Therefore, independent claims 31, 36, 49, 58 and 67 are allowable over the prior art.
4. Claims 32-35, 37-48, 50-56, 59-66 are allowed by the same rational as well as the further limitations added by these dependent claims.
5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
